

Brevia EX3 Espresso Machine - Instructions

Before first use

Rinse the water tank and fill it with fresh cold water. Run two empty cycles through the group head and the steam wand.

Making espresso

Use 18 grams of finely ground coffee for a double shot. Tamp with even pressure. A good shot takes 25 to 30 seconds and gives about 36 grams of espresso. The pump delivers 15 bar.

Milk

Purge the steam wand before and after steaming. Keep the tip just below the surface until the milk reaches about 60 degrees.

Descaling

Descale every two months, or when the orange descale light comes on. Use Brevia descaling liquid diluted 1:4 with water and run the descale programme (hold both cup buttons for 5 seconds). Never use vinegar; it damages the seals.

Warranty

Two years from the date of purchase. The warranty is void if the machine has not been descaled as described above.
